Buildings - South Kanara district Mangalore - D.S.P's bungalow - Improvements.

--

The bungalow of the D.S.P. at Mangalore, which is on the top of a hill, looking west, is reported to requir certain alterations to make it reasonably habitable durin the monsoon. The Superintending Engineer, Coimbatore circle, who has inspected the bungalow, ~~suggests that~~ considers it necessary to build up a verandah with a terraced roof on the side of the bungalow facing the west, ~~in order to ward off~~ to provide shelter from the monsoon and the sun. The I.G. of Police is reque ted to report urgently whether the improvements can be carried out without undue demands on controlled materials and if so, to submit urgently an estimate for the approval of the Govt. If the proposal is accepted, the work should be put in hand forthwith so as to be finished before the next South West monsoon sets in.

To the I.G. of Police.
Copy to the C.E., P.W.D. (Genl. Bldgs. & Defence) with 4 original drawings C.A. Nos. 173, 174, 175 of 1935 and 130 of 1944 returned.

3.

My dear Priestly,

Sub. Improvements to the D.S.P.'s Bungalow at Mangalore.

With reference to our conversation in January last I enclose a list of controlled materials required for the proposed works for the bungalow of the District Superintendent of Police, Mangalore. The detailed estimate is not complete yet and so the list is only approximate. The quantities are not small.

There is no time to complete the work before the Monsoon this year.

Yours sincerely,

13.4.45.

Encl. 1 list of controlled articles.

To

G.W.Priestly Esq., C.I.E., I.C.S.,
Adviser to His Excellency
the Governor of Madras.

To
The Secretary to the Government of Madras, Home Department.

3287-1

C No. 3284/HB/45 dated 12th June 1945.

Sir,

Sub: Buildings - South Kanara district - Mangalore - Residence of the District Superintendent of Police - Improvements.

Ref: Memorandum No.263 K/45-3, Home, dated 20-1-45

I submit for the approval of the Government plans and estimates for the following improvements to the quarters of the District Superintendent of Police at Mangalore in the South Kanara District:-

Work.	Amount of estimate Rs.
1. Construction of verandah in the ground and first floors.	15,200
2. Construction of a store room and storage tank.	3,250

2. I enclose (i) extracts of a letter from the District Superintendent of Police, South Kanara, explaining the necessity and urgency for item (2) above and (ii) a list of controlled articles required for both the items. The Superintending Engineer, Coimbatore Circle, is of opinion that these articles cannot be replaced by substitutes.

3. The work will be carried out by the Public Works Department and the expenditure met from their budget allotment. As the work cannot be completed before the ensuing monsoon it will be taken up after the monsoon is over.

ANNEXURE I.

Extract of letter R.C.No.213/Audit/45, dated 14-2-45, from the District Superintendent of Police, South Kanara, Mangalore, to the Inspector-General of Police, Madras.

Sub: Buildings - South Kanara District, Mangalore - Quarters of District Superintendent of Police - Improvements.

Ref: Correspondence ending with Chief Office R. C.No.61-2/H & B/45, dated 8-2-45.

In memorandum No.203/A/43-3, dated 20-1-45, the Government were pleased to reopen Suo Motu the question of constructing a verandah which was considered necessary to make the bungalow reasonably habitable during the monsoon. This naturally led me to hope that they would also kindly reconsider their order regarding the construction of the water tanks and the store-room, which if simultaneously carried on with the construction o the verandah would undoubtedly be less expensive than they would be otherwise and are absolutely essential. In fact the tanks are not only meant for storing water for all purposes except drinking but also to take off the water from the gutters and downfall pipes etc. The Public Works Department considered the construction of these necessary and had even submitted the plans and estimate for them. I believe that the reasons for putting up the water tanks given in my report No.4/Aud./42 dated 13-11-42 and reiterated in my report dated 20-1-45 are convincing considering the increasing difficulty in getting sufficient supply of water. I would even prefer to have the water tanks to the verandah.

2. The bungalow has an outhouse with only four small rooms which cannot even accommodate the servants. There is practically no room for storing camp samans, fuel etc; hence the necessity for atleast a store room. These reasons had been embodied in my report dated 13-11-42.

Sub: D.S.P.'s bungalow, Mangalore -
Unsuitable design. ---

When I was in Mangalore in December the District Superintendent of Police asked me to look at his bungalow because he had been informed that alterations to the bungalow could not be made during the war. He said that the bungalow was hardly habitable during the South-West Monsoon. It is built on the top of the hill looking west. The design of the bungalow comes from the design of Mrs. Buck's house at Adyar and Saidapet and has been copied into two smaller bungalows for Under Secretaries at Adyar. The modifications are that the two mosquito proof sleeping rooms at the two corners of the bungalow have been made into rooms with glass windows and the roof is a tiled roof instead of flat roof. If the D.S.P.'s bungalow is looked at from without one would have the impression that the first floor is glazed in verandah but actually there are no verandahs at all andall the windows

of the rooms. This is a very great disadvantage when a bungalow faces west and the heavy South-West monsoon comes driving straight at the house. Presumably for economy the roof has a very short overhang. So much so that it is with the greatest difficulty some light chicks have been fixed to the very edge of the roof to keep the sun out of the bed rooms during the fine weather.

The windows are much too broad and are hinged at the sides. In the Under Secretary's bungalows they are hinged top and bottom in the centre and each window is not so broad. The consequence of a broad window is that when a storm comes unless the windows are shut very quickly the wind is apt to tear the windows off the hinges The lower parts of the walls below the windows are not made of masonry but of Asbestos sheets and this also leads in water. And above the windows there are ventilat which have wooden shutters and these also let rain through I am sure that a bungalow which was designed for East Coa without verandahs is not suitable for the West Coast and its heavy monsoon. There is not even a gutter along the

ctually there is a gutter on the opposite side of the ouse where there are no rooms but only a back verandah or the use of servants.

The bungalow was inspected by Turner, the uperintending Engineer, and I think his proposal is o build up a false front to the bungalow which would have ~~a thack-~~ furnace proof. Of course the front would have windows o take the first brunt of the Monsoon. This construction ould be ~~kxg~~ laterite and I do not see why the building f it should have to be delayed because of war condi-ions. I am sure that it will assist if the P.W.D. ould be told that they could push on with this improve-ment. If the work is to be done in time for the next Monsoon ~~xkx~~ it should be started in March.

Yours Sincerely
Horne

W. Priestley, Esq., C.I.E., I.C.S.,
Adviser to H.E. the Governor of Madras,
Fort St. George.

Issue

10/1/45.

Re: A1 ....minute above -

The D.S.P.'s letter on p. 3 ante (Y) shows that the D.S.P.'s bungalow is situated on a hill in Mang-lore but does not say where. The plans recen from the CE. show that the front of the bungalow faces N.W. and the rear S.E.

The plans sent by the C.E. ~~show the~~ details of the first & ground floors to a cross

of each floor. There is also a plan indicating the proposed verandah in rear of the building – flag (E) – presumably it is to the improvement indicated in this plan that Mr Gamm refers in the last para. on p.3 and?

Ethel
12/4/45

N.145.S.
Ju

Below in office

[illegible] Adv. asked [illegible] below.

He does not think the proposed verandah in the rear has anything to do with it. It must be a separate proposal to roof in the terrace at the back. At the same time Mr Gamm's sketch does look much more like the back of the bungalow than the front.

Mr Turner, the C.E. [illegible]

Mr Gamm inspected the bungalow & instructed the improvements as in Madras for a few days. If Adv. wanted like to discuss the bungalow with him at first ask him to come to Nuwara Eliya on a flying visit & not concern at anything.

Gen Jt. Ad thank it.

dated 16-1-1945.

My dear Bett,

In reply to the above I will call at the Secretariat on the morning of Thursday 18th at 11-00. If that time is not convenient a telephone message fixing a suitable time will suffice. I can't come on the afternoon of Wednesday as I have an appointment with the dentist.

yours sincerely,

J. R. Bett. Esq.

16. 1. 45

I have seen Mr Turner, who has explained the matter
The plan of proposed verandah flagged E is the alteration that
is required. pp. 7-8
What appears to be the back of the bungalow looks out towards
the sea towards the west.

Hence this side of the house gets the full force of the S W monsoon
out also at other times of the year get the full glare of
the setting sun

Graves's letter pp 1-3 above to be perused

I entirely agree with Mr Graves that something needs to be
done about it

The trouble is that a design adapted for Madras where
winds stronger than the sea breeze are unusual where trees to
shade off the sun has been adopted for a bungalow set on a
hill in Mangalore fully exposed to the sun & the storms from
the west

The thing was silly was obviously done by people ignorant of
the conditions they had to deal with. The new design has been

found unsuitable in Irish where there are high winds during a considerable portion of the year

Anyhow the house has been built as there, one have to make the best of it

I am afraid that I do not regard these proposals as improvements of the ordinary kind to a house which by & large is quite habitable without them. When proposals are made to make the house reasonably habitable

A house without a ~~in~~ Mayo or ~~in~~ that wild ~~hill~~ with living rooms facing the ~~sea~~ which has no verandah to ward off the storms of the sun, is in my mind a monstrosity.

If the additions can be carried out without undue demand on imported materials I should like them to be put in hand if they are so as to be finished before next S W season

11

Draft submitted for approval

20-4-45 20/4/45 21.4.45.

Issued as Memo No. 263 K/45-4
From the I.G. of Police Rc No 520-1 [illegible]

Please see the notes on pp. 1 - 16 ante. The proposal in
his file is to carry out improvements, as indicated in the plar
on pp. 7-8 of (E), to the quarters of the D.S.P, Mangalore
i.e., the construction of a verandah. With reference to the
emo on p.5 c.f., the I.G. has now submitted plans and
estimates for the following two items of improvements to the
uarters:-

	Cost Rs.
(1) Construction of a verandah in the ground and first floors ...	15,200 0-0
(2) Construction of a store room and storage tank.	3,250 0-0
Total.	18,450 0-0

2. Item (1):- Construction of a verandah. -

The necessity and urgency for a verandah has already been explained. Please see the minutes of Advisers on pp. 13 - 14 and 16 ante. A list of iron and steel article

and other controlled materials involved in the work is given in Col. (3) of the statement on p. 21 c.f.

Item (2) - Construction of a Store room and storage tank

Please see the papers in G.O. No. 1501, Home, dated 12-5-4 in which the Govt. considered that these improvements should be postponed for the duration of the war. It is for consideration whether for the reasons given on p. 19 c.f., the orders of the Govt. will be reconsidered . A list of iron, steel and other controlled articles required for the work is given in Col.(4) on p. 21 c.f. It may be mentioned that the estimate which amount to Rs.1,700 in April 1944 has now gone up to Rs.3,250/-. It is stated that the present estimate is based on the current schedule of rates.

3. After orders are passed, the file may be sent to P.W.D. and Finance for remarks before circulation.

14/6/45 The mandah is the smallest thing. Since 2 estimates for this mandah & the tanks etc. given are separate there seems to be little chance of Govt. saving money if this two are done at the same time. In view of this amount a Rs.5000/- and, I do not think one or both estimates will be sanctioned.

A/ The estimate & the remarks can be awaited
Secy. S/ To see on wait.

further noks and orders in circulation on ff 16-20 bove may be perused. While submitting plans ed estimate for the construction of a verandah in ie ground and first floors (which has been accepted y A1) the D.G. has renewed the proposal for construction of a store room and storage tank hich has been ordered to be postponed for the uration of the war in the G.O. at (y). The cost on account of the above two items is Rs. 15,200 and . 3,250 respectively. Both Home and P.W. Depts have accepted the estimate of Rs 15,200 for the construction of e verandah and have suggested that the second item, viz. construction of a store room and tank, ay be postponed. P.W.D. state that the standard ent of the building will be increased from Rs 150 G.O. 2417 e Govt. will not realise any extra rent on account of the improvements proposed & as rent is to be of pay etc. is given

2/ From ff 19 cf. it is seen that the D.S.P. Galle Kanara (the occupant of the quarters the most interested party) considers that the water difficulty is so great that he would prefer to have water tanks to the verandah. The cost of constructing a water storage tank comes to about Rs. 2430. In view of the preference given by the D.S.P. Galle Kanara, (& the fact that the expe will be unremunerative) it is for orders whether this Dept. may suggest that the construction of a water storage tank alone may be taken up and that the other items (construction of verandah as well as a store room) be postponed. If, however, the proposal of Home Dept at 'A' on ff 19 above is to be agreed to this expenditure

This need not be taken literally: he merely wants to emphasise the need for storage

KAV 29.6.45

@ 2'. The work is urgent

Rd of costing Rs. 2400 roundly.

@ costing Rs. 16,000 roundly

should be treated as on a "new service" of Rs 1 (6) under item V on p/16 of the New Service pamphlet. Home Dept. will have to obtain orders in full circulation and also the authorisation of H.E. the Governor on a supplementary statement of expenditure in due course

KRV 29.6.45 Dow

H 25.6.45 H 27/6/45. The proposal of the Home Dept. may be accepted subject to the remark at A above. I agree. Dow 30.6

KRV 29.6.45 H Hom.

Home Dept.

Please see the notes from p. 18 ante. P.W.D. and Fin. accept the proposals of this dept:

(1) to approve the construction of a verandah in quarters of the S.S. Mangalore at an estimated cost of Rs. 15,200; and

(2) to defer the construction of a store room and a storage tank in the quarters.

2/ For orders as to circulation — Vide A above. Of the two proposals of the P.C. at p/17 ante, the need for the verandah was admitted in January last — vide A3 & A1's minutes on pp 13 to 16 ante.

Fi 3.7.45 Fin 3/7/45

The work involves the use of steel and cement, which can be permitted only in really essential cases. This work may be regarded as a special case & therefore the quantity of controlled materials specified in Col. (3) of the Statement on p. 21 ante may be allowed for

Orders may now be taken in full circulation & authorisation for a supplementary statement of expenditure may be taken later
